Subject: MMS Pest Control

To whom it may concern:

The KCHA was having problems with Bed Bugs for the first time in its history. It utilized its normal Pest Control company to spray to eradicate this infestation. In some instances it worked, in others they kept coming back.

The KCHA got an email from MMS Pest Control Center introducing a product to treat bed bugs. It was an environmentally safe product, one that our maintenance could apply and it could be applied on surfaces where other chemical treatments our Pest Control could not apply theirs. We purchased two gallons and tried it. IT WORKS! Within hours bed bugs were dying! And even in the hardest unit hit with these, two treatments took care of our problem. And, there was little to no interruption for the tenants! Within 30 minutes they were able to return to the unit. There was a cedar scent, no chemical smell as with most applications. We have reordered and will utilize this product when we have more reports. We highly recommend this product, simply because it works and anyone can apply it.

Since then we have also ordered the product to kill roaches and again, IT WORKS!

Both of these products are now part of our inventory. If you have any questions, please feel free to contact me or my Maintenance Manager, Lonnie Paden, at 815-939-7125. If you use this product, you will be satisfied!

Sincerely,

Randy McGill  
Executive Director
